MATERIAL SAFETY DATA SHEET

Product Name: Cytarabine Injection

1. CHEMICAL PRODUCT AND COMPANY INFORMATION

Manufacturer Name And Address
Hospira, Inc.  Hospira Australia Pty Ltd
275 North Field Drive  1 Lexia Place
Lake Forest, Illinois 60045  Mulgrave VIC 3170
USA  AUSTRALIA

Emergency Telephone #'s
Australia (02) 8014 4880 224 212-2055

Material Name
Cytarabine Injection

Synonyms
4-amino-1-β-D-arabinofuranosyl-2(1H)-pyrimidinone; 1-β-D-
Arabinofuranosylcytosine; 4-Amino-1-β-D-arabinofuranosylpyrimidin-2(1H)-
one; Ara-C; Cytosar.

2. HAZARD INFORMATION / CLASSIFICATION

Emergency Overview
Cytarabine Injection contains cytarabine, a synthetic pyrimidine nucleoside anti-metabolite used in combination chemotherapy to treat some types of cancer. It is a cytotoxic agent. In the workplace, this preparation should be considered potentially irritating to the skin, eyes, and respiratory tract, a potential occupational reproductive hazard, harmful to the fetus, and a potential human carcinogen. Following an accidental over-exposure, possible target organs may include the bone marrow, gastrointestinal tract, central nervous system, skin, eyes, lungs, and the fetus.

Occupational Exposure Potential
There are scientific studies that suggest that personnel (e.g. nurses, pharmacists, etc.) who prepare and administer parenteral antineoplastics (e.g. in hospitals) may be at some risk due to potential mutagenicity, teratogenicity, and/or carcinogenicity of these materials if workplace exposures are not properly controlled. The actual risk in the workplace is not known.

Signs and Symptoms
This material should be considered irritating to the skin, eyes, and respiratory tract. In clinical use, adverse effects have included severe nausea and vomiting, bone marrow depression, rash and hair loss, pain and redness of the palms and feet, respiratory distress, and neurological effects such as ataxia, dysphasia, and nystagmus.

Medical Conditions Aggravated by Exposure
Pre-existing hypersensitivity to cytarabine. Pre-existing gastrointestinal, pulmonary, skin, central nervous system, bone marrow, and ocular ailments; pregnancy.

Carcinogen Lists: IARC: Not listed  NTP: Not listed  OSHA: Not listed

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient Name
Cytarabine

Chemical Formula
C9H13N3O5

</table>

Non hazardous ingredients include water. Hazardous ingredients present at less than 1% include sodium chloride; sodium hydroxide and/or hydrochloric acid are added to adjust the pH.
4. FIRST AID MEASURES

Eye Contact  Remove from source of exposure. Flush with copious amounts of water. If irritation persists or signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary.

Skin Contact  Remove from source of exposure. Flush with copious amounts of water. If irritation persists or signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary.

Inhalation  Remove from source of exposure. If signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary.

Ingestion  Remove from source of exposure. If signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary.

5. FIRE FIGHTING MEASURES

Flammability  None anticipated for this aqueous product.

Fire & Explosion Hazard  None anticipated for this aqueous product.

Extinguishing Media  As with any fire, use extinguishing media appropriate for primary cause of fire.

Special Fire Fighting Procedures  Firefighters should wear self-contained breathing apparatus. Protective equipment and clothing should be worn to minimize contact with the respiratory tract, skin and eyes.

6. ACCIDENTAL RELEASE MEASURES

Spill Cleanup and Disposal  Put on suitable protective clothing and equipment as specified by site spill procedures. Isolate area around the spill. Absorb liquid with suitable material and clean affected area with soap and water. Dispose of materials according to the applicable federal, state, or local regulations.

7. HANDLING AND STORAGE

Handling  Cytarabine is a cytotoxic agent. Appropriate procedures should be implemented during the handling and disposal of cytotoxic antineoplastics agents to minimize potential exposures. Several guidelines on handling cytotoxic antineoplastic agents have been published. There is no general agreement that all of the procedures recommended in the guidelines are necessary or appropriate. Consult your site hygienist or safety professional for your site requirements.

Avoid ingestion, inhalation, skin contact, and eye contact. When handling this product, precautions may include the use of a containment cabinet. The use of disposable gloves and respiratory protection is recommended. Proper disposal of contaminated vials, syringes, or other materials is required when working with this material.
7. HANDLING AND STORAGE: continued

**Storage**

No special storage is required for hazard control. However, employees should be trained on the proper storage procedures for antineoplastic agents. For product protection, follow USP controlled room temperature storage recommendations noted on the product case label, the primary container label, or the product insert.

**Special Precautions**

Persons with known hypersensitivity to cytarabine, or who may be immunocompromised. Women who are pregnant, or women who want to become pregnant, should consult a health and/or safety professional prior to handling this material.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Exposure Guidelines**

<table>

</tbody>
</table>

**Notes:**
- OSHA PEL: US Occupational Safety and Health Administration – Permissible Exposure Limit
- ACGIH TLV: American Conference of Governmental Industrial Hygienists – Threshold Limit Value.
- EEL: Employee Exposure Limit.
- TWA: 8 hour Time Weighted Average.
- STEL: 15-minute Short Term Exposure Limit.

**Respiratory Protection**

Respiratory protection is normally not needed during intended product use. However, if the generation of aerosols or vapors is likely, and engineering controls are not considered adequate to control potential airborne exposures, the use of an approved air-purifying respirator with a HEPA cartridge (N99 or equivalent) is recommended under conditions where airborne aerosol concentrations are not expected to be excessive. For uncontrolled release events, or if exposure levels are not known, provide respirators that offer a high protection factor such as a powered air purifying respirator or supplied air. A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions require respirator use. Personnel who wear respirators should be fit tested and approved for respirator use as required.

**Skin Protection**

When handling this material, disposable gloves should be worn at all times. Further, the use of double gloves is recommended. Disposable gloves made from nitrile, neoprene, polyurethane or natural latex generally have low permeability to oncolytic agents. Persons known to be allergic to latex rubber should select a non-latex glove. Gloves should be changed regularly, and removed immediately after known contamination. Care should be taken to minimize inadvertent contamination when removing and/or disposing of gloves.

**Eye Protection**

As a minimum, the use of chemical safety goggles is recommended when handling this material.

**Engineering Controls**

If the generation of aerosols is likely, local exhaust ventilation is recommended to minimize employee exposures. The use of an enclosure, such as an approved ventilated cabinet designed to minimize airborne exposures, is recommended.

LD50 is the dosage producing 50% mortality.

Aspiration Hazard
None anticipated from normal handling of this product.

Dermal Irritation/Corrosion
None anticipated from normal handling of this product. Inadvertent skin contact with this product may produce irritation and redness.

Ocular Irritation/Corrosion
None anticipated from normal handling of this product. Inadvertent eye contact with this product may produce irritation, redness, and discomfort.

Dermal or Respiratory Sensitization
None anticipated from normal handling of this product. In clinical use, allergic edema has been reported infrequently.

Reproductive Effects
In animal studies, cytarabine was embryotoxic in mice and teratogenic in mice and rats when given during the period of organogenesis. In mice, cleft palate, phocomelia, deformed appendages, and skeletal abnormalities were noted in offspring of mice given intraperitoneal dosages ≥ 2 mg/kg/day during organogenesis. In rats, deformed appendages were noted in the offspring after dams were given cytarabine as a single intraperitoneal dosage of 20 mg/kg on day 12 of gestation. Reduced prenatal and postnatal brain size, and permanent impairment of learning ability, was noted in the offspring of rats given a single intraperitoneal dosage of 50 mg/kg on day 14 of gestation. In mice, cytarabine produced embryotoxicity, characterized by decreased fetal weight, when given at a dosage of 0.5 mg/kg/day during organogenesis; it also caused an increase in early and late resorptions, and decreased live litter sizes, at a dosage of 8 mg/kg/day. FDA Pregnancy Category D.

Mutagenicity
Cytarabine was mutagenic in in vitro tests, and was clastogenic in vivo (chromosome aberrations and SCE in human leukocytes) and in vitro (chromosome aberrations and SCE assay in rodent bone marrow, mouse micronucleus assay). Cytarabine caused the transformation of hamster embryo cells and rat H43 cells in vitro. Cytarabine caused a dose-dependent increase in sperm-head abnormalities and chromosomal aberrations occurred in mice given intraperitoneal cytarabine.

Carcinogenicity
The carcinogenic potential of cytarabine has not been fully evaluated.

Target Organ Effects
This material should be considered irritating to the skin, eyes, and respiratory tract. Following an accidental over-exposure, possible target organs may include the bone marrow, gastrointestinal tract, central nervous system, skin, eyes, lungs, and the fetus.
12. ECOLOGICAL INFORMATION

Aquatic Toxicity Not determined for product.
Persistence/Biodegradability Not determined for product.
Bioaccumulation Not determined for product.
Mobility in Soil Not determined for product.

13. DISPOSAL CONSIDERATIONS

Waste Disposal Disposal should be performed in accordance with the federal, state or local regulatory requirements.
Container Handling and Disposal Dispose of containers and unused contents in accordance with federal, state and local regulations.

14. TRANSPORTATION INFORMATION

</tr>
</thead>
</table>

**GHS Precautionary Statements:**

**Prevention:**

- Do not eat, drink or smoke when using this product.
- Obtain special instructions before use.
- Do not handle until all safety precautions have been read and understood.
- Use personal protective equipment as required.
- Avoid breathing vapors or aerosols.
- In case of inadequate ventilation wear respiratory protection.
- Wear protective gloves.
- Wash hands thoroughly after handling.
- Contaminated work clothing should not be allowed out of the workplace.

**Response:**

IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell.

IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms call a POISON CENTER or a doctor.

IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs, seek medical attention. Take off contaminated clothing and wash before reuse.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

If exposed or concerned, get medical attention.
Product Name: Cytarabine Injection

15. REGULATORY INFORMATION: continued

EU Classification
*Medicinal products are exempt from the requirements of the EU Dangerous Preparations Directive. Information provided below is for the pure drug substance cytarabine.

Classification(s):  
| Irritant Category 2 | Mutagen Category 2 | Toxic for Reproduction Category 2 |

Symbol:  

Indication of Danger:  

Xi  T  T

Risk Phrases:  
- R36/37/38 - Irritating to eyes, respiratory system and skin  
- R46 - May cause heritable genetic damage  
- R48/25 - Danger of serious damage to health by prolonged exposure if swallowed  
- R60 - May impair fertility  
- R61 - May cause harm to the unborn child  
- R64 - May cause harm to breastfed babies

Safety Phrases:  
- S23: Do not breathe vapor or spray  
- S24: Avoid contact with the skin  
- S36/37/39: Wear suitable protective clothing, gloves and eye/face protection.  
- S60: This material and its container must be disposed of as hazardous waste
